

MAURICE VICTOR

SOFTWARE ENGINEER

Maurice.network13@gmail.com

678-999-2150

<https://maurice.vercel.app>

For nearly 10 years, I've worked as a full stack developer.

I am extremely knowledgeable in my field and am not afraid to put in long hours.

When it comes to taking on challenges, I am humble yet confident, and decisive yet measured.

Meanwhile, I'm constantly eager to learn new things.

I know a lot of cool stuff, but there's always opportunity for development, so it's no surprise that I learn something new and intriguing every day.

What can I contribute? JavaScript is one of my favorite programming languages.

I've spent a lot of time exclusively using JavaScript to create websites and web apps.

Not to mention the fundamentals, I am quite proficient in NodeJS, ExpressJS, ReactJS, VueJS, and Angular 2+ alongside Typescript, which I have worked with during recent years.

Despite the fact that I now prefer to work in JavaScript, I began my career with PHP and have never abandoned it.

I'm particularly familiar with Laravel, which pairs well with Vue.js, which I adore, and which naturally drew me in.

In addition, I continue to use more traditional yet "beautiful" technologies like Java Spring, Python Django, and RoR.

Last but not least, I'm familiar with CMS platforms including WordPress, Hubspot, Magento, and Ghost, as well as cloud services like AWS (serverless framework) and GCP.

I'm also familiar with SEO and performance benchmarking and improvement.

Education & Credentials Career Experience

Bachelor's Degree in Computer Science (2005 – 2010)

Clark Atlanta University

Certificate of Higher Education, UX Design and Research, (2019 – 2020)

Tech Talent South

Certificate, Responsive Web Design, (2023)

freeCodeCamp

Full Stack Engineer | Flower Press Creative Studio

May 2020 - Mar 2023

- Held concurrent responsibility for interpreting UI/UX wireframes, optimizing web applications for speed, and building a library of reusable code using Angular, React(including Next.js, Gatsby), Vue(including Nuxt.js) and TypeScript
- Created custom websites and web apps using JavaScript frameworks as per client specification
- Designed and implemented scalable backend using Node.js and Ruby on Rails as per client specification
- Built cross platform apps using Ionic, React Native and Expo CLI

Technical Proficiencies

Languages: HTML, CSS, SQL,

JavaScript, TypeScript, PHP, Python, Ruby

Frameworks: Bootstrap, Material UI, AntD, Tailwind CSS, React, Redux, Next.js, Gatsby, Angular, Vue.js, Nuxt.js, React Native, Ionic Framework, NativeScript, Cordova, Capacitor, Node.js, Express.js, Nest.js, Laravel, Django, Ruby on Rails

Databases: Mongo DB, MySQL,

PostgreSQL

Software & Tools: Git, AWS, Firebase, Heroku, Netlify, Vercel

Full Stack Engineer | Mayven Studios

Oct 2016 - Apr 2020

- Played an instrumental role in number of projects leveraging hands-on experience in React, Vue.js, Nuxt.js, Angular, and Node.js
- Developed new features using modern best-practices, including version control, continuous integration, automated tests, and daily deploys
- Participated in Agile processes, code reviews, and release testing and collaborated with multicultural development and implementation teams
- Designed database based in MySQL and PostgreSQL

Software Engineer | Healthgrades

Feb 2013 – Aug 2016

- Design and develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize applications for maximum speed, scalability and SEO
- Collaborate with other team members and stakeholders
